Manufacturer:

Cooper Crouse-Hinds GmbH previously CEAG Sicherheitstechnik GmbH Neuer Weg Nord 49

D-69412 Eberbach, Germany

Germany

Manufacturing location(s):

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacture'rs quality system, relating to the Ex produ covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

STANDARDS:

The electrical apparatus and any acceptable variations to it specified in the schedule of this certificate and the identi documents, was found to comply with the following standards:

Electrical apparatus for explosive gas atmospheres - Part 0: General requirements IEC 60079-0: 2004 Edition: 4.0 Electrical apparatus for explosive gas atmospheres - Part 1: Flameproof enclosure 'd' IEC 60079-1: 2003

Edition: 5

Electrical apparatus for explosive gas atmospheres - Part 11: Intrinsic safety 'i'

Schedule

EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

Control units of type GHG 44.V.... consist of a bottom part and a cover with separately approved internal sealing devic They are made of moulded plastic or VA4 sheet steel or light alloy .

See details in addendum to IECEx BKI 07.0023.

CONDITIONS OF CERTIFICATION: NO

Annexe: Addendum to IECEx BKI 07.0023.pdf

IECEX BKI 07.0023

Page 1 of 3

1. Description

Control units of type GHG 44.V.... consist of a bottom part and a cover with separately approved internal sealing device. They are made of moulded plastic or VA4 sheet steel or light alloy.

Rail-type webs or top-hat rails have been grooved (plastic enclosure) or riveted (metal enclosure) into the bottom part of the enclosure. They are intended for take up the built-in elements.

Assembling of the control units is permitted.

Attached Ex cable entries has to be covered by separate certificate.

Both variants are suitable for durable use.

The built-in elements, if required, can be covered by separate certificates e.g. pushbuttons, signal lamps, measuring instruments and/or terminals, or other separate approved components of increased safety "e" and flameproof enclosure "d" and

Enclosures with one, two or three units can exclusively be used for the installation of the terminal blocks with the type of protection increased safety "e", covered by separate certificate.

The identification with the symbols of the types of protection is adapted to the components that actually installed.

3. General parameters

Electrical data

Rated voltage max. 690 V Rated current max. 40 A or 63 A Rated cross-sectional max 6 mm²

Power consumption for signal lamps max 1,8 W / per lamps

for MCB/RCB max. 11,2 W / per MCB/RCB for T6

15,5 W / per MCB/RCB for T5 38,3 W / per MCB/RCB for T4

The electrical data for the built-in components can be gathered from the respective certificates Electrical safety I class of electrical safety standards (MSZ EN-IEC 60598)

4. Ambient temperature

Subject to the sealing used, the maximum ambient temperature is -55 $^{\circ}$ C \leq Tamb \leq +55 $^{\circ}$ C

4.1 Ingress protection and working temperature range for control and display element

Control and display element (actuator)	IP protection	Working temperature range

IEC TECEX

ADDENDUM TO IECEX CERTIFICATE OF CONFORMITY

3rd amendmento to IECEx BKI 07.0023

Page 1 of 2

1. Description

Control units of type GHG 44.R.... consist of a bottom part and a cover with separately approved internal sealing device. They are made of moulded plastic or VA4 sheet steel or light alloy .

Rail-type webs or top-hat rails have been grooved (plastic enclosure) or riveted (metal enclosure) into the bottom part of the enclosure. They are intended for take up the built-in elements.

Assembling of the control units is permitted.

Attached Ex cable entries has to be covered by separate certificate.

Both variants are suitable for durable use.

The built-in elements, if required, can be covered by separate certificates e.g. pushbuttons, signal lamps, measuring instruments and/or terminals, or other separate approved components of increased safety "e" and flameproof enclosure "d" and encapsulation "m".

Enclosures with one, two or three units can exclusively be used for the installation of the terminal blocks with the type of protection increased safety "e", covered by separate certificate.

The identification with the symbols of the types of protection is adapted to the components that actually installed.

2. Type assortment

GHG 44. R.... Legend of the signs from left to right

1, 2, 3	Code for Manufacturer

3rd amendmento to IECEx BKI 07.0023

Page 2 of 2

3. General parameters

Electrical data

Rated voltage max. 690 V
Rated current max. 40 A or 63 A
Rated cross-sectional max 6 mm²
Power consumption for signal lamps max 1,8 W / per lamps
for MCB/RCB max. 11,2 W / per MCB/RCB for T6
15,5 W / per MCB/RCB for T5

 $38,\!3$ W / per MCB/RCB for T4 The electrical data for the built-in components can be gathered from the respective certificates Electrical safety I class of electrical safety standards (MSZ EN-IEC 60598)

4. Ambient temperature

Subject to the sealing used, the maximum ambient temperature is -55 $^{\circ}C$ \leq Tamb \leq +55 $^{\circ}C$

4.1 Ingress protection and working temperature range for control and display element

4.1.1 Dust

The actuator elements used in the enclosure may also be employed in areas in which a potentially explosive atmosphere as a mixture of dust and air can occasionally form.

Control and display element (actuator)	IP protection	Working temperature range
Signal lamp GHG 410 1413	IP66	-20 °C to +40 °C
Push button GHG 410 1402	IP66	-20 °C to +40 °C
Double pushbutton GHG 410 1407	IP66	-20 °C to +40 °C
Measuring instrument AM72 GHG 410 1917	IP66	-20 °C to +40 °C
Mushroom-head emergency button GHG 410 1405	IP66	-20 °C to +40 °C
Control switch Ex 29/28 GHG 420 / 430 10	IP66	-20 °C to +40 °C
Control switch Ex 23 GHG 420 / 430 10	IP66	-20 °C to +40 °C
Dummy element GHG 410 6666	IP66	-55 °C to +90 °C
Measuring instrument AM 45 GHG 410 1915	IP66	-20 °C to +60 °C
Mushroom-head emergency button with lock GHG 410 1406	IP6X	-20 °C to +55 °C
Key operated pushbutton GHG 410 1404/35	IP6X	-20 °C to +55 °C
Rotary switch Ex 41 GHG 410 14 08/	IP6X	-20 °C to +55 °C
Potentiometer GHG 410 1427	IP6X	-20 °C to +55 °C

4.1.2 Gas

For gas applications the values of clause 4 are applicable with the following restrictions:

- provision of an M45 measuring instrument actuator
 - In that case the minimum ambient temperature range is reduced to -40°C.
- installation of a control switch type Ex 23 GHG23.R...., including the actuator type 8602/. In that case the minimum ambient temperature range is reduced to -20°C.

5. Ingress protection: IP66 to IEC 60529 (moulded plastic enclosure)

Notes for manufacturing and operation

The "Notes for manufacturing and operation" will also apply to the supplement.

The enclosure made from material SMC 190 has to carry the following warning: "Clean with moist cloth only."

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

STANDARDS:

The electrical apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

IEC 60079-0: 2004

Electrical apparatus for explosive gas atmospheres - Part 0: General requirements

Edition:4.0

IEC 60079-11: 1999

Electrical apparatus for explosive gas atmospheres - Part 11: Intrinsic safety 'i'

Edition:4

IEC 60079-18: 1992

Electrical apparatus for explosive gas atmospheres - Part 18: Encapsulation 'm'

Edition:1

IEC 60079-7: 2001

Electrical apparatus for explosive gas atmospheres - Part 7: Increased safety 'e'

Edition:3

IEC 61241-0: 2004

Electrical apparatus for use in the presence of combustible dust - Part 0: General requirements

Edition:1

IEC 61241-1: 2004

Electrical apparatus for use in the presence of combustible dust - Part 1: Protection by enclosures "tD"

Edition:1

This Certificate does not indicate compliance with electrical safety and performance requirements other than those expressly included in the Standards listed above.

TEST & ASSESSMENT REPORTS:

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in
