755174 --	3 x LLC900	LED	-	995	939
755274 --	4 x LLC900	LED	-	1275	1219
755374 --	5 x LLC900	LED	-	1555	1499

Standard installation kit:

Flat connector with cover x1
Flange for flat connector x1
Brackets for wall mounting x2

General characteristics:

Nominal voltage: 220 - 240V AC - 50 / 60 Hz
Input voltage range: 198 - 264V AC
Protection class: I
Protection rating: IP 67
Mechanical impact resistance rating: IK10++ / 80 J

Light source: Fluorescent lamps or LED modules, depending on version.

Power(s): as per label product.

Reference(s): as per label product.

- Standard reference: 75-76xxx00 no detection (see this instruction)
- Options regarding the end of product's reference (see specific instructions):
 - 75-76xxx21 Dali dimmable + switch dimming + standby warning
 - 75-76xxx12 with Pro detection
 - 75-76xxx14 with Pro detection + extinction warning
 - 75-76xxx15 with Pro detection + standby warning
 - 75-76xxx16 with Pro detection + radio-control
 - 75-76xxx04 slave version + extinction warning
 - 75-76xxx05 slave version + standby warning

Other reference(s) with option(s):

- See specific instructions.

Conditions of use

Horizontal position: Fluo and LED version.

Vertical position: Fluo and LED version (cable gland downwards, marking of the tubes downwards).

Mounting / Installation

Warning, versions employing LEDs are at risk from ESD (electrostatic discharges).

Fitting & installation must be carried out by a professional installer in accordance with current installation standards.

Isolate the power before fitting and connecting up.

Opening the luminaire:

Open the stainless steel flange.

Slightly remove the geartray to have an access to the connector.

Fixing:

To mount the luminaire, use the supplied brackets with diameter 8mm flat head screws and suitable plugs, according to the type of the wall, to ensure a maximal lever resistance. Screws and plugs are not supplied with the luminaire.

Preparing the cable entry grommet class 1 (Standard reference 75-76xxx00):

The cable must be prepared as per the diagrams. Respect the polarity. Put the flange of the flat connector.

Preparing the cable entry grommet class 2 (Standard reference 75-76xxx009502):

The cable must be prepared as per the diagrams. Respect the polarity. Put the flange of the flat connector.

➤ For other cases, refer to the specific instructions for connection and splitting off.

Closing the luminaire:

Connect the plug to the geartray's connector and lock the connector.

A – Engage the flange and tighten the flange's screws.
B – Tighten the cable gland.

Cleaning

Cleaning of the luminaire is limited to cleaning the diffuser for proper light output. Clean the diffuser (luminaire must be closed) using a damp cloth or with soapy water.

DO NOT USE DETERGENT

Maintenance

In order to prevent any risks, maintenance on the luminaire must be carried out by a professional installer or an authorized person with equivalent qualifications.

Replace the light source(s) when worn out.

Recyclability

The FIL A is an eco-designed luminaire:

- All the plastic or metal components can be dismantled and recycled via appropriate facilities.
- All the electronic components such as the LED circuit, power supply, etc. can be dismantled and recycled via appropriate facilities.
