

**Five Mounting/Radiation Directions.** Note: radiation direction is according to illustration, direction = flat side.

**1.** Make sure the included mounting bracket is mounted on a smooth surface.

**2.** Decide preferred direction for best possible performance before mounting the antenna into the mounting bracket.

**3.** Place the antenna into the mounting bracket, and make sure it "clicks" into place.

**4.** Fasten the cable and tighten the connector with the correct torque according to the specification of the connector.

# SMARTEQ™ antennas

Smarteq, based in Stockholm, Sweden, is a leading developer of antennas and antenna systems for increased availability, efficiency, and security in the more and more wireless world. Smarteq aims towards the market segments M2M, automotive, and mobile communications (of voice and data).
