

Technical conditions for mounting series

BASET-N-LED, MULTIBASET-N-LED, BASET-N-Em-LED

In case of any eventing on light fitting in premises with danger of explosion, the national safety rules and regulation for prevention of accidents are to be observed, with danger of explosion.

BASET-N-LED - LED luminaire with LED diode and waterproof lighting fixtures designed for the lightening premises

BASET-N-Em-LED - non - maintained emergency fitting.

MULTIBASET-N-LED - maintained emergency fitting.

Mounting instruction:

1. Take the fixture from transporting packing.
2. Remove reflector from the luminaire.
3. Remove the bag with equipment.
4. The side opening in the body - plant the cable gland (which is included in the luminaire equipment), and on the other side of her body screw the nut. Cable gland nut to the body, tighten to torque 2.7Nm.
5. Fasten the lighting fixture on the base:
 - a) With a fastening spring directly on the base
 - b) With a cable suspension (no included)
- Note: another method of fastening is not allowed!**
6. Pull the power cable through the cable gland. Tighten bushings to a state of partial deformation of the rubber sealing washers, tightening torque 2.5Nm. Supply cable must have an outer diameter in the range (see Table Sealing areas), which is a necessary condition for correct function of cable gland. Hole for power cable in the housing, which is not used/cable gland (which is contained in the equipment luminaire), seal blanking plug. In the luminaire is not allowed to use protective plugs and cable glands breathing.
- Recommendation: Attend to correct stripping and supply cable connection.
7. Connect supply cable into the feeding terminal block as follows.

MULTIBASET-N-LED

- | | | | |
|-----------------------|---------------------|---------------------------|------------------------|
| BASET-N-Em-LED | on terminal L1 | - cond. of charging phase | on terminal L1 |
| on terminal L1 | - neutral conductor | on terminal L2 | - neutral conductor |
| on terminal N | - protective cond. | on terminal N | - protective conductor |
| on terminal \oplus | | on terminal \ominus | |

To each pole of terminal block can be connected two conductors in cut 0.75 - 2.5 mm².

8. Insert the reflector back into the fixture and secure it with a plastic latch that holds the reflector on the body. In the case of a luminaire with one row of LED modules, snap the reflector onto the metal handle.
9. Insert the stainless clips (which are included in the equipment) into the prepared plugs on body.
10. Attach the luminaire cover to the housing so that it abuts all the circumference of the seal located in the luminaire housing slot.
11. Secure the optical cover with stainless steel clips.

Test of operation:

- For correct operation it is necessary to observe enclosed instruction about testing of emergency fixtures. Switch the luminaire off the mains voltage. The emergency LED module must light. The green LED in the reflector is off. Should the emergency lamp be extinguished within the test period though the battery is fully charged, the latter will have to be replaced by a new battery set.
- Warning: The full battery capacity will be available after approximately three charging/discharging cycles.

Warning for the mounting of **BASET-N-LED, MULTIBASET-N-LED, BASET-N-Em-LED** light fittings:

The light source and gasket in this lighting fixture can be replaced only producer or its contractual service technique or a similarly qualified person.

The fitting can be installed only by authorized person.

WARNING – potential danger of electrostatic charging.

WARNING – the lighting fixture must be installed in the position, which does not allow the touch of persons and parts of the fixture.

WARNING – the lighting fixture must be fixed in the position.

WARNING – the lighting fixture must be cleaned with damp duster only. It is necessary to keep periodic cleaning intervals of lighting fixture.

WARNING – DON'T OPEN WHEN AN EXPLOSIVE ATMOSPHERE MAY BE PRESENT

When installing lighting fixture, observe the ESD safety using appropriate tools!

Lighting fixtures are not allowed to be used in atmospheres with appearance of vibrations, aggressive chemical substances and smear.

Such conditions decrease lifetime of plastic parts.

Maintenance:

WARNING – the fixture should be cleaned with damp duster only. It is necessary to keep periodic cleaning intervals of lighting fixture.

Application of light fittings:
The explosion proof light fittings meet the standards according to the EU instructions 2014/34/EU.
They can be used in areas with danger of explosion according to the following chart:

Area with danger of explosive	Classification of area	
	Marking	Compulsory regulation
Danger of explosion of inflammable dust	BESEN1	ZONE 22 CSN EN 60079-14 CSN EN 60079-10-2
Danger of explosion of inflammable gas and vapour	BESEN2	ZONE 2 CSN EN 60079-14 CSN EN 60079-10-1
Technical data:		
Admissible range of operating temperature BASET-N-LED-2R-2950/2600/2250-4K		-20°C a2+40°C
Admissible range of operating temperature MULTIBASET-N-LED-IR-180/150/1300-4K		-20°C a2+0°C
Admissible range of operating temperature MULTIBASET-N-LED-800/1500/1300-4K		0°C a2+35°C
Admissible range of operating temperature BASET-N-Em-LED-350-4K		0°C a2+50°C
Protection level: IP66		
Insulation class: I		
Rated voltage and frequency:		220-240 V, 0/50/60 Hz 110-120 V, 0/50/60 Hz
for driver TRIDONIC:		220-240 V, 0/50/60 Hz 110-120 V, 0/50/60 Hz
Operation and maintenance instructions:		
The light fittings which operate in areas of above mentioned premises, are under the requirements resulting from composition regulations of valid EN.		
- The light fitting must be sealed with plugs M20.		
- Free outlet for supply cable must be sealed with plugs M20.		
- Any change or replacement of components of the light fittings, which can influence the protection before the danger of explosion, are forbidden.		
- The repair of the light fittings can be done only by person with relevant qualification, only with original spare parts		
- In compliance with the latest regulations.		
- The operation with cracked cover is forbidden; replace the damaged cover immediately!!!		
- In the fixtures series BASET-N-LED, MULTIBASET-N-LED, BASET-N-Em-LED can be used through wiring connection. Maximum allowed number of connected fixtures is referred in Table. Recommended protection is type B, 10A.		
- The lighting fixture can be connected to the mains supply with a cable with cross sections in the range of 1mm ² - 2.5mm ² .		
The fixtures are certified by FZU, AO 210, Ostrava – Radovice:		
1.) Certificate of type FZU 18 ATEX 04/8X from date 17.9.2018		
Marking lights:		
BASET-N-LED	BASET-N-LED	CE II 3G Ex nR IIC T6 Gc
MULTIBASET-N-LED	MULTIBASET-N-LED	CE II 3D Ex tc IIIC T65°C Dc
(MULTIBASET-N-LED-X-R2R)	(MULTIBASET-N-LED-X-R2R)	25
Maximum permissible number of continuously three-phase and connected BASET-N-LED, MULTIBASET-N-LED luminaires:		
Pict. 1		
Pict. 2		
Maximum permissible number of continuously single-phase and connected BASET-N-LED, MULTIBASET-N-LED luminaires:		
Pict. 1		
Pict. 2		
Battery change:		
Battery change is necessary when the fixture doesn't observe the conditions of rated operation period durability. In explosive area it is prohibited to disconnect battery for emergency unit. It is allowed to disconnect the fixture from supply voltage.		
1. Disconnect the fixture from supply voltage.		
2. Remove reflector from the housing.		
3. Disconnect cable from terminal block.		
4. Disconnect battery from emergency unit in non-explosive area as follows:		
5. Unbolt the nut of battery holder.		
6. Remove the old battery.		
7. Screw the new battery (mark the date of operation start).		
8. Connect conductors to battery as follows: „+“ red conductor and „-“ black conductor.		
9. Connect the fixture to supply voltage.		
10. Equip with reflector and cover. Fix it with the clips.		

WARNING : The battery in the fixture can be changed for the same type or the same parameters only !!!

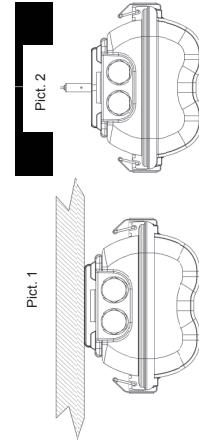

Table: List of cable glands

Cable glands	Diameter of the cable for cable glands M20x1.5
OBO V-TEC EX CEAG CHG 960 92... P...	$\varnothing 7-21\text{mm}$
WISKA SKEN (S)(L)(*)-RDE	$\varnothing 5-13\text{mm}$
ELFIT UNI	$\varnothing 7-21\text{mm}$
